

## **RALPH LAUREN INTRODUCES THE NAUTICAL COLLECTION**

Inspired by the timeless allure of the open sea, Ralph Lauren unveils two new expressions of the Nautical Collection. Drawing on the character of vintage maritime instruments, each timepiece captures the spirit of adventure through a lens of understated elegance. The collection is offered with either a deep Black Dial or a luminous Off-White Dial, each housed in a distinctive 42 mm case finished in antique brass-toned stainless steel.

Rich in texture and warmth, the brushed antique brass finish evokes treasured objects shaped by salt air, distant horizons, and years of travel. The Black Dial presents a bold and confident attitude, while the Off-White Dial offers a softer, more refined interpretation. Together, they reflect two moods of the same journey, united by a shared sense of heritage and timeless style.

Beneath their vintage-inspired aesthetic lies the precision of Swiss watchmaking. Each timepiece is powered by the self-winding RL514 manufacture movement, created by Piaget for Ralph Lauren, bringing together technical excellence and enduring sophistication.

More than a watch, the Nautical Collection is an invitation to embrace exploration, craftsmanship, and the enduring romance of life at sea.
